Allowable Subject Matter

1. Claims 1-40 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 20-32 were deemed Allowable in Paragraph 10 of the Office Action mailed 06/27/08. Claim 20 recites a container assembly comprised of inner and outer containers. The outer container includes a first longitudinal groove and the inner container has a second longitudinal groove such that when the inner container is placed in the outer container the grooves align to allow air to vent from between the tubes through a venting pathway at the open top of the outer tube. Claim 28 recites a method of assembling the device of claim 20. The Examiner did not find prior art which teaches or suggests these features.

Claims 1, 14 and 33 recite a container assembly comprised of inner and outer containers. The assembly includes a venting pathway extending between the inner surface of the outer tube and the outer surface of the inner tube. The venting pathway is comprised of a combination of a textured surface area having a bottom boundary and a longitudinal groove having at least a portion that extends below the bottom boundary of the textured area. The Examiner did not find prior art which teaches or suggests these features. The Examiner considers the previously cited Iskra references to be the closest prior art. Iskra teaches a collection container having an inner tube, outer tube and venting pathway having a textured surface, but Iskra does not teach nor suggest a venting pathway comprised of a combination of a textured surface area having a bottom

boundary and a longitudinal groove having at least a portion that extends below the bottom boundary of the textured area.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
